jigsaw pieces fit may take  
some careful puzzling >*

“present and future risks can also interact with each other to form a ‘polycrisis’ – a cluster of related global risks with compounding effects, such that the overall impact exceeds the sum of each part”  
*World Economic Forum, Global Risks Report 2023*

# “Polycrisis”

[This is why 'polycrisis' is a useful way of looking at the world right now](#)  
(World Economic Forum)

“the shift from “polycrisis” to “permacrisis” implies that we now see our crises as situations that can only be managed, not resolved. Indeed, “permacrisis” suggests that every decision to accelerate a difficult situation in order to come out on the other side of it risks something far worse.” *Neil Turnbull*

# “Permacrisis”

[Permacrisis: what it means and why it's word of the year for 2022](#)  
(The Conversation)

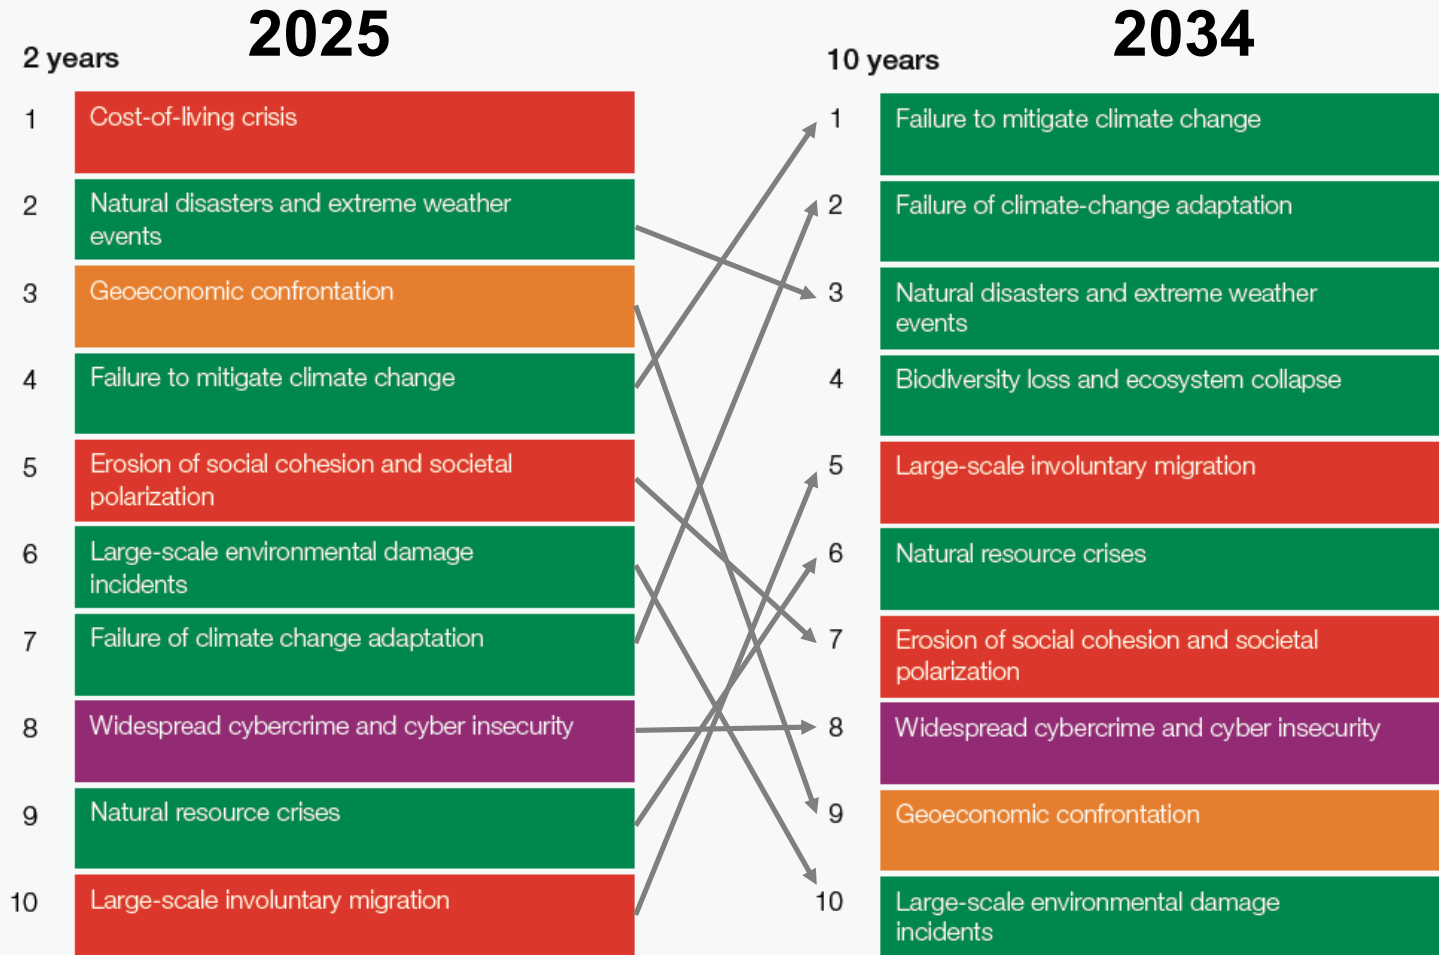

We are dedicated to the study and  
mitigation of risks that could lead to  
human extinction or civilisational  
collapse

[ABOUT US](#)

## Global risks ranked by severity over the short and long term

"Please estimate the likely impact (severity) of the following risks over a 2-year and 10-year period"

Risk categories | Economic | Environmental | Geopolitical | Societal | Technological

Whether you think this is terminal, or something we'll resolve,  
the situation is grave...

Yes, but what's this got to do with **TEL**?

Whether you think this is terminal, or something we'll resolve, the situation is grave...

Yes, but what's this got to do with TEL?

**Diagnosis: Failure to learn...**

Failure to learn to live within planetary limits

Failure to understand our complex interdependence with the natural world

Failure to master technology to enable not undermine civic society

Failure to control our cognitive biases

Failure to mature out of our selfishness

Failure to educate the next generation to break out of this cycle

Failure to cultivate the leaders who acted on the above in time

Failure to ...

We all care — but the polycrisis is HUGE...

Other legitimate responses...?

Not fair — TEL obviously works at a different level to global politics

...?

## 6. EMPOWERING PEOPLE

**At the turn of the century, Edgar Morin  
advocated a RELATIONAL school  
where the fragmented knowledge and  
skills of our times could be interconnected  
in order to respond to the human  
condition, the identity of the planet,  
the recognition of uncertainty,  
the urge of mutual understanding,  
and the ethical imperative**

<https://www.researchgate.net/publication/373708099> The Culture of Education in the Age of Artificial Intelligence

An invitation and  
provocation to feed back  
on my work-in-progress...

I'm here to learn  
from you!

**Should our work  
change in any way  
to reflect the crises  
we face?**

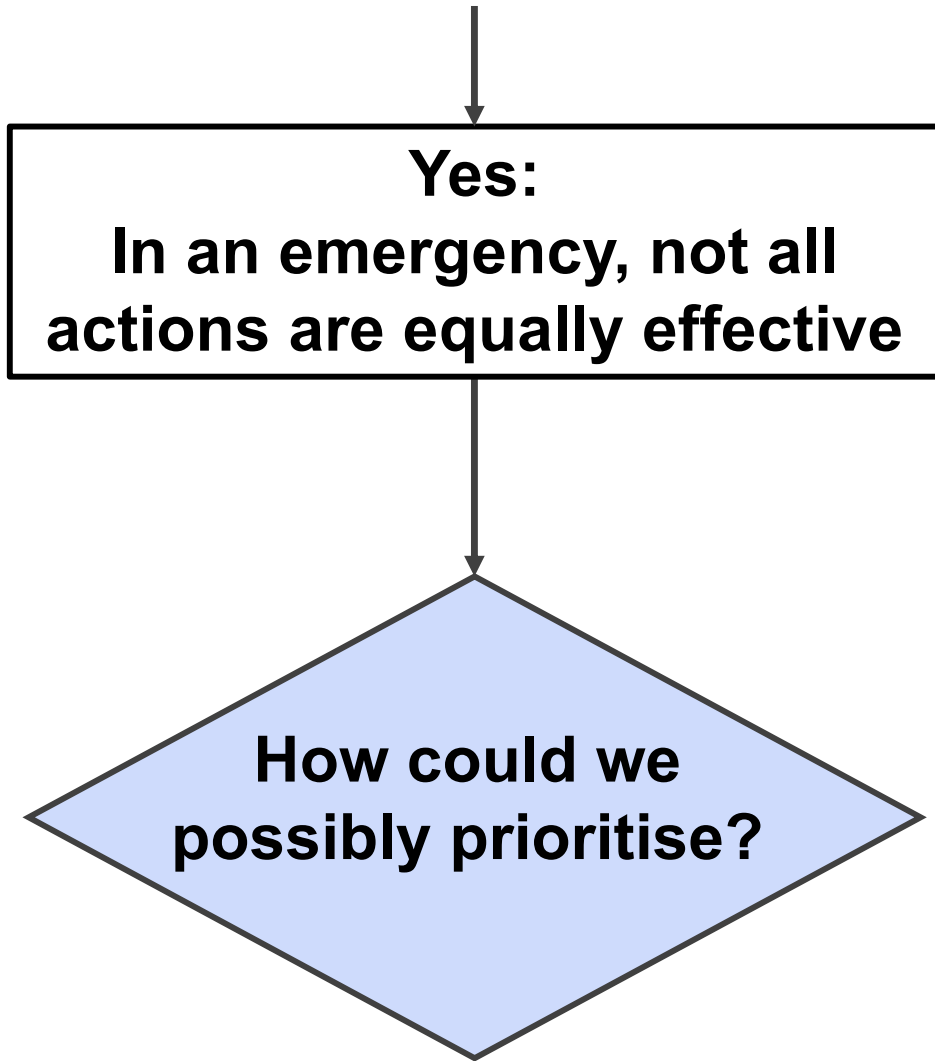

**No: education is an intrinsic  
societal good. It can always  
be improved of course and  
that's what I'm working on.**

**Carry on...**

**Yes:  
In an emergency, not all  
actions are equally effective**

**Let's prioritise...**

**Yes:  
In an emergency, not all  
actions are equally effective**

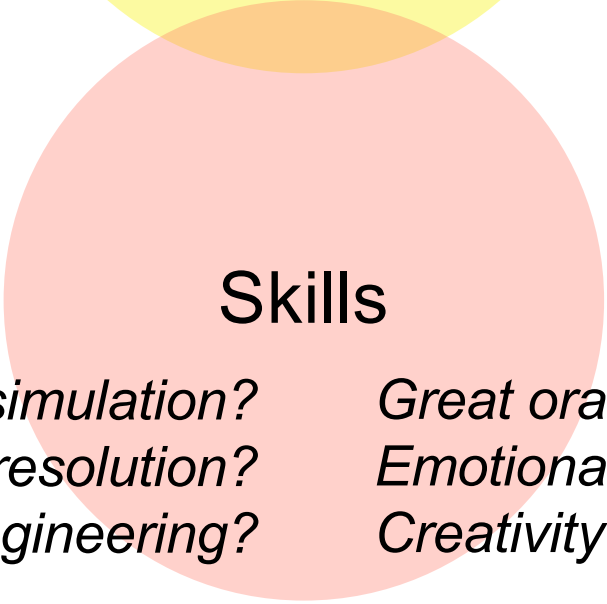

**How could we  
possibly prioritise?**

**Knowledge**

- Systems science?*
- Climate science?*
- Green tech?*
- Performing arts?*
- Literature*
- Social work?*

**Skills**

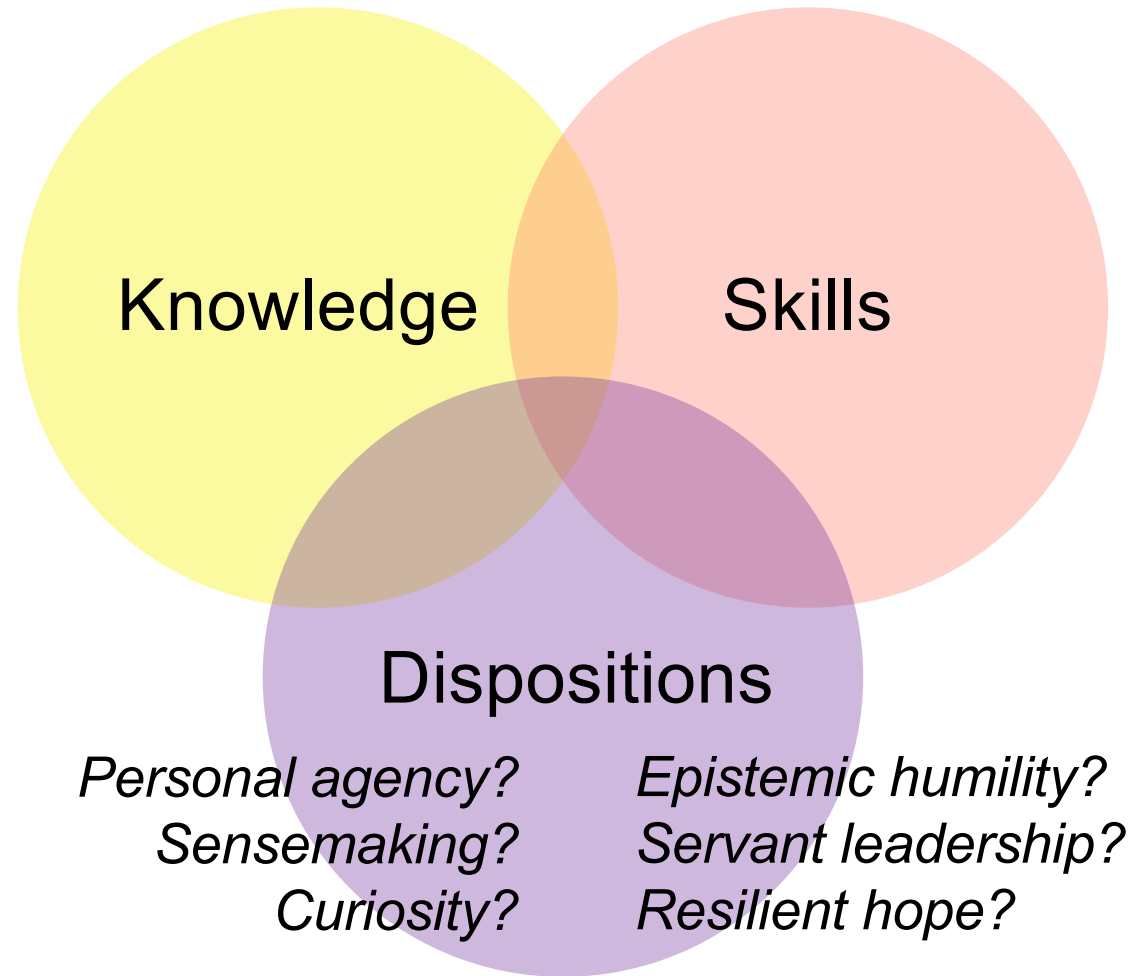

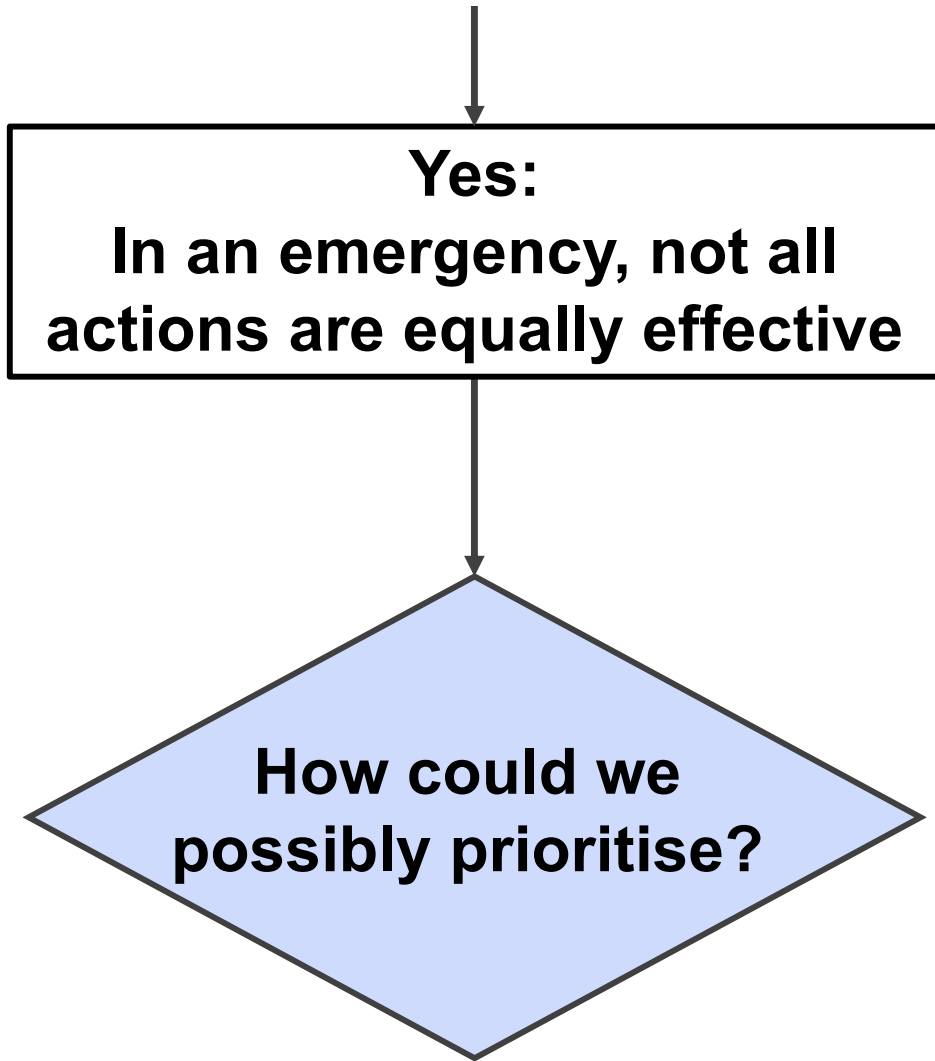

- Computational simulation?*
- Conflict resolution?*
- Prompt engineering?*
- Great oratory?*
- Emotional intelligence?*
- Creativity?*

**Should our work  
change in any way  
to reflect the crises  
we face?**

**No: education is an intrinsic  
societal good. It can always  
be improved of course and  
that's what I'm working on.**

**Carry on...**

# Dispositions?

“Knowledge of methods alone will not suffice: there must be **the desire, the will, to employ them.** This desire is an affair of personal **disposition.**”

John Dewey, 1933

## Dispositions?

“One of the key issues emerging from these findings was the **learner’s orientation towards the unknown, uncertainty and ambiguity**, and their tendency to either **retreat from it or move into it**. The former effectively precludes deep learning, and the latter is the beginning point for it.”

Ruth Deakin Crick & Chris Goldspink

When we ask *Why?* enough times, we soon run into...

*values... power... politics... history...*

**What is the  
purpose of  
education?**

# Transforming education to cultivate global citizens

Networking Ministries and  
Agencies in *Global Education*.

**Global Education Network Europe (GENE)** is the European network of Ministries and Agencies with national responsibility for policymaking, funding and support in the field of Global Education.

GENE <https://gene.eu>

## Definition

Global Education is education that enables people to **reflect critically** on the world and their place in it; to **open their eyes, hearts and minds** to the reality of the world at local and global level.

It empowers people to **understand, imagine, hope and act** to bring about a world of **social and climate justice, peace, solidarity, equity and equality, planetary sustainability, and international understanding**. It involves respect for human rights and diversity, inclusion, and a decent life for all, now and into the future.

# “Reclaiming a future that has not yet been”

Gert Biesta

Biesta, G. Reclaiming a future that has not yet been: The Faure report, UNESCO’s humanism and the need for the emancipation of education. *Int Rev Educ* 68, 655–672 (2022).

<https://doi.org/10.1007/s11159-021-09921-x>

*[I]t seems to us, that through the knowledge it provides of the environment in which it operates[,] education may help society to become aware of its problems and, provided that efforts are centred on training “complete men” who will consciously seek their individual and collective emancipation, it may greatly contribute to changing and humanizing societies (Faure et al. 1972, p. 56; emphasis in original).*

## 1972 vs. 2008

In a knowledge society where demands for skills, competencies and knowledge constantly increase and change, lifelong learning is a key strategy to adjust human capital to new requirements, e.g. caused by technological change. More generally, one may consider lifelong learning as a reaction to an acceleration of social, economic and technological change (ELLI Development Team 2008, p. 8).

Gert Biesta

One argument in favour of the “societal dysfunctionality” of education, Mollenhauer contends, is the idea that education can never just be about the insertion of the new generation into the existing social order – education as *adaptation* – but also has a role to play in helping children and young people to find their own position in society – education as *emancipation* (see Mollenhauer 1968, pp. 22–23). Regarded from this angle, the role of education is not just to secure the continuation of the past and the present; it also needs to have an orientation towards the future, particularly with the intention of keeping the future “open” for the new generation rather than determining their future for them. In this line of thinking, which is already visible in

Gert Biesta

## Education “in a time between worlds” (Zak Stein)

“...societies require each new generation to be in a position to inherit the requisite capabilities, legitimacy, and meaning-making to continue the project of cooperative social life.

...

Failing this, the intergenerational fabric of the social world begins to fray. At some point inadequate education results in an inability to fill essential institutional roles, provide motivating meanings, and secure political legitimacy.”

<https://systems-souls-society.com/education-is-the-metacrisis/>  
<https://systems-souls-society.com/education-must-make-history-again/>

# These times compel us to rethink education: *Bildung*

“*Bildung* is a Germanic term with English and Greek roots and Nordic and American fruits.

[...] it means something like

**transformative civic education**

[...] the sense of

**fulfilling one’s nature or purpose**

in response to the challenges

[...] *Bildung* entails a dynamic world view that values

**independence of mind and spirit**

**grounded in ecological and social**

**interdependence.”**

Jonathan Rowson

## Pedagogy of Resistance

*Against Manufactured  
Ignorance*

Henry A. Giroux

“It is hard to imagine a more urgent moment for taking seriously ongoing attempts to make education a fundamental element of politics. At stake here is the notion that education is a social concept, one rooted in the goal of emancipation for all people. Moreover, this is an education that encourages **human agency**, one that enables people to be both **critical thinkers** and **committed individuals** and **social agents**.”

(emphasis added)

How do our AI visions  
for the future of education relate  
to the obligations of democracy?

How can our platforms be used to  
combat learned helplessness in the age  
of disinformation machines?

How do we imagine a future in which  
AI becomes a fundamental tool for  
expanding creative, socially  
responsible agency?

*Giroux (2023), personal communication*

So, education must  
cultivate global citizens.

And not sell its soul to capitalism, or the  
forces threatening democracy.

*But the critiques of our predicament  
– and hence of education –  
run deeper...*

“metacrisis... draws attention to interiority (**meta as within**) and relationality (**meta as between**) as spiritual features of what is typically assumed to be a political challenge, while also highlighting that a fixation with crisis may preclude other and better ways of being in the world (**meta as beyond**)” *Jonathan Rowson*

NB: McGilchrist debunks pop psychology and management snake oil:

*“Left Brain = analytical and reliable*

*Right Brain = creative but unreliable”*

Why is the brain asymmetric, deeply divided, and why is the corpus callosum largely *inhibitory*?

# Why is the brain asymmetric, deeply divided, and why is the corpus callosum largely *inhibitory*?

## THE MASTER & HIS EMISSARY

"The brain is—in fact it has to be—a metaphor of the world." ... "In terms of the metaphor of the Master and his emissary, the Master realises the need for an emissary to do certain work on his behalf (which he, the Master, must not involve himself with) and report back to him. That is why he appoints the emissary in the first place. The emissary, however, knowing less than the Master, thinks he knows everything and considers himself the real Master, thus failing to carry out his duty to report back." — Iain McGilchrist

### LEFT HEMISPHERE (THE EMISSARY):

- The hemisphere of "what" / The **speaking** hemisphere
- **Exclusive, either/or, analytic, fragmentary, linear, sequential, explicit, abstracted, compartmentalized, static, certainty, finitude, lifeless**
  - Attention is **local, narrow, focused**
  - Focuses on **stasis** or a **point in time**
- **Re-presents experience** in non-living, mechanical form
  - Deals with what it already knows (is **familiar** with)
- Body as something from which we are relatively **detached**
  - Self as an **expression of will**
    - Thinking is **decontextualized** and systematic
- Sees agglomerate of **parts** (then reconstructs a "whole")
- Concerned with **memory for facts** and public knowledge
- **Emotionally relatively neutral** (superficial, social emotions)
  - Ultimately **disconnected from the "Other"**
    - Concerned with **abstract categories** and types
    - **Less reliable** in attention, perception, judgment, etc
- **Optimistic but unaware** of what it is missing (deluded, denial)
- Interested in the **man-made** ("the fruits of human invention")
- Principal concern is **utility** (grasping and amassing "things")
- More useful for **manipulation** of the world and one another
- **Competition, rivalry**, and capacity for deliberate **malice**

 SLOWW.CO

### RIGHT HEMISPHERE (THE MASTER):

- The hemisphere of "how" / The **silent** hemisphere
- **Inclusive, both/and, synthetic, embodied, holistic, embodied, holistic**
  - Attention is **global, wide, diffuse**
  - Perceives **flow**
- Tends to **ground experience**
- Openness to **interconnectedness**
  - **Body as something**
- Deeply connected to **the world**
- **Understands context** of language, metaphor, narrative
- Sees the **bigger picture** and **the whole** and in their **context**
- **Episodic memory, longer working memory, deductive reasoning, insight**
- Affinity with **emotions** (emotional perception / emotional understanding)
- **Connected with the "Other"** (nature, other people, new, uncertain, etc)
  - Interested in the **uniqueness/individuality** of things/beings
  - Role in "**theory of mind**" (putting oneself in another's mind)
  - **Social understanding** and **social behavior**, capacity for **empathy**
    - Reads human **facial expressions**, vocal intonation, gesture
  - **Smiling, laughing, and humor** but prone to **sadness** and **depression**
- **Music as "language"**: melody, tone, timbre, pitch-processing, harmony
- **Moral judgment**, sense of **justice**, and capable of **compassion**

*Read later!*

<https://www.sloww.co/left-brain-right-brain-hemispheres/>

*From the study of brain-damaged patients:*

## The world as seen by the left hemisphere

“... static, isolated, fragmentary elements that can be manipulated easily, are decontextualised, abstracted, detached, disembodied, mechanical, relatively uncomplicated by issues of beauty and morality [...] and relatively untroubled by the complexity of empathy, emotion and human significance

[...] It is an inanimate universe — and a bureaucrat’s dream. There is an excess of confidence and a lack of insight.”

## The world as seen by the right hemisphere

“All is flowing and changing, **provisional, and complexly interconnected** with everything else. Nothing is ever static, detached from our awareness of it, or disembodied; and **everything needs to be understood in context**, where, if it is not to be denatured, it must remain implicit.

Here, wholes are different from the sum of the parts, and **beauty and morality, along with empathy and emotional depth, help us to intuit meaning** that lies beyond the banality of the familiar and everyday. It is an animate universe - and a **bureaucrat's nightmare.**”

**We need both ways of attending to the world,  
but it's not just a case of “balance”**

**Analytical, manipulative, ‘thing-centric’ modes  
of attending and acting (LH) must be in  
service to holistic, empathic, relational modes  
(RH)**

**Since LH reductionist attention has come to  
dominate we now perpetuate a distorted world**

McGilchrist calls us to restore **Intuition and Imagination** as important ways to understand the world

*All 4 intertwine...*

Science

Reason

**Intuition**

**Imagination**

# McGilchrist calls us to re-forge 3 vital relationships

with **each other**

with **nature**

with the **sacred**

...reinforcing the need to learn from

**Indigenous knowledge systems**

**McGilchrist:** ancient cultures understood what we now understand to be hemispheric specialisation

**cf. Tyson Yunkaporta:** [Sand Talk](#)

Can we develop AI that:

integrates all 4 ways of knowing?

trusts people with greater agency  
rather than metricising them?

reconnects us with each other,  
nature and the cosmos?

# “Hospicing Modernity” Vanessa Machado de Oliveira

<https://www.penguinrandomhouse.com/books/675703/hospicing-modernity-by-vanessa-machado-de-oliveira/>

<https://youtu.be/JZgq3h6pPxU?si=qOOgPhsluDdndpiP>

# “Hospicing” ...

This word was used to refer to acting with compassion to assist systems to die with grace, and to support people in the process of letting go—even when they are holding on for dear life to what is already gone.

## ***Interrupting Self-Infantilization***

The stories of this book heed the Indigenous insight that amongst all other animals humans are the youngest, and amongst all human cultures the modern culture is the youngest and is caught up in a loop of immature, irresponsible, and self-infantilizing behaviors. Therefore, the stories issue an invitation for modern humans to wake up, smarten up, step up, own up, clean up, grow up, and show up differently as the metabolism of the planet and humanity within it face enormous challenges.

## ***Modernity Is Faster than Thought***

Modernity predetermines what can be heard; what can be deemed real and possible; what can be imagined as desirable and ideal; and how we are supposed to feel, behave, and communicate within these parameters. This conditioning is precognitive—it is faster than thought itself

## ***Constitutive Denials***

In the story of modernity as a wording of the world, what modernity/coloniality disavows can be thought of as **constitutive denials**: what we need to (be made to) forget in order to believe what modernity/coloniality wants us to believe in, and to desire what modernity/coloniality wants us to desire. There are at least four main constitutive denials sanctioned within modernity/coloniality that severely restrict our capacity to sense, relate, and imagine otherwise.<sup>22</sup>

1. the denial of systemic, historical, and ongoing violence and of complicity in harm (the fact that our comforts, securities, and enjoyments are subsidized by expropriation and exploitation elsewhere);
2. the denial of the limits of the planet and of the unsustainability of modernity/coloniality (the fact that the finite earth-metabolism cannot sustain exponential growth, consumption, extraction, exploitation, and expropriation indefinitely);

3. the denial of entanglement (our insistence in seeing ourselves as separate from each other and the land, rather than “entangled” within a wider living metabolism that is bio-intelligent); and
4. the denial of the magnitude and complexity of the problems we need to face together (the tendency to look for simplistic solutions that make us feel good and look good and that may address symptoms, but not the root causes, of our collective complex predicament).

## Western academic arrogance has an armoury of defence mechanisms

- **Logocentrism** relates to the indexing of reality in language (i.e., “I say, therefore it is”).
- **Universalism** relates to the search for an objective and universal description of reality (i.e., “I think, therefore it is *all* there is”).
- **Anthropocentrism** relates to the perception of humanity as separate from nature and having a mandate to own, manage, exploit, and control it (i.e., “I own, therefore I rule”).

*Interesting examples of the opposition she encounters in her work in universities*

# Western academic arrogance has an armoury of defence mechanisms

- **Teleological reasoning** relates to establishing pre-defined goals for engineering the world and getting the greatest value for the energy spent (i.e., “I plan, therefore it will be”).
- **Utility-maximizing** is a transactional mode of reasoning that calculates action according to the greatest benefits to be gained (i.e., “I invest, therefore I benefit from it”).
- **Dialectical thinking** relates to a linear logic of progression (of thesis, antithesis, and synthesis) that is averse to paradoxes, complexities, and contradictions (i.e., “It is this, therefore it cannot be that”).
- **Allochronic and evolutionary thinking** relate to judging others according to criteria where oneself is represented as being in the present and at the apex of (linear) time and evolution (i.e., “I succeed because I am intelligent and strong, therefore you perish because you are unintelligent, uneducated, and weak,” in other words, “I rock, therefore you suck”).

**Should our work  
change in any way  
to reflect the crises  
we face?**

**No: education is an intrinsic  
societal good. It can always  
be improved of course and  
that's what I'm working on.**

**Carry on...**

**Yes:  
In an emergency, not all  
actions are equally effective**

**Let's prioritise...**

## **Polycrisis • Permacrisis • Metacrisis**

learning analytics and personalised,  
automated feedback that foreground...*

**student sense of belonging**

**storytelling**, especially  
the student's self-narrative

**reflection** on personal experience  
that integrates "head+heart"

**student agency** to articulate purpose  
and shape their learning

# A student's sense of belonging is positively linked to...

- Successful transition into higher education
- Persistence and graduation rates
- Academic performance
- Mental health and well-being

*Institutions can influence students' sense of belonging*

Ahn, M. Y., & Davis, H. H. (2020). Four domains of students' sense of belonging to university. *Studies in Higher Education*, 45(3), 622-634.

Meehan, C., & Howells, K. (2019). In search of the feeling of 'belonging' in higher education: Undergraduate students transition into higher education. *Journal of Further and Higher Education*, 43(10), 1376-1390.

## Belonging is often understood to have two parts:

### “(i) **a sense of valued involvement**

(the feeling of being valued, needed, and accepted in the system or environment); and

### (ii) **a sense of fit**

(the person’s perception that his or her characteristics are shared with or complementary to those present in the system or environment.)”

## Belonging study @ Georgetown University

two chances to re pronounce them. There was only one other Latina in the classroom, who I knew and her name was common-- Maria, her name was pronounced. Then he got to mine. I already knew the perplexed look. So before he could even try, he looked at me and all I did was say [student name]. I waited for him to attempt. He replied: sorry, I don't speak Spanish and moved on. From then on he never attempted, not once, to pronounce my name. Every time I participated in class he would just point at me. That was my first class at Georgetown. That was my first interaction with a professor. I was not going to be given the respect of my white counterparts. My name did not deserve a mere attempt. I was used to having people mispronounce it, but not to have them ignore it so bluntly.

## Belonging study @ Georgetown University

*“Earlier this semester, I had the opportunity to attend 1vyG, the largest first-generation, low-income student conference in the nation, as a Georgetown delegate, alongside six other amazing Hoyas. Throughout our time at the conference, being able to share my struggles and stresses and my triumphs and victories as a first-generation student of color with our delegation, illuminated a new, profound sense of solidarity. To me, our small, yet powerful delegation represented the best of Georgetown because we recognize that even though our identities could make life on the Hilltop difficult, we continue to be fearless, unapologetic, and determined. Georgetown is not Georgetown without its black, brown, low-income, first-generation, undocumented, queer, etc. student population, and being part of this illustrious community on campus has been one of my greatest blessings.”*

## *Hypothesis:*

If it is possible to track valid indicators of students' sense of belonging longitudinally, at scale, in a timely manner, “**Belonging Analytics**” could contribute significantly to learning, well-being, and equity in higher education.

*Snapshots of 4 complementary approaches...*

# Participatory Narrative Analytics for “belonging”

Online survey integrated into a narrative analytics platform (SenseMaker) <https://thecynefin.co/sensemaker/>

**G** SENSEMAKER

What is this Survey?

This survey seeks to better understand student experiences at Georgetown. By using student narratives, we hope to learn about the nuances that conventional surveys fail to uncover. The survey that follows takes about 15 minutes to complete. We encourage you to read through the entire survey on the page below to understand what questions we are asking before you begin.

Please respond to the prompt below. Please share only one story with us. If you have more than one story, we welcome you to take the survey again after you complete your first story.

Think of a meaningful time you felt a part of or not a part of Georgetown. Please describe what happened in 1-2 paragraphs.

Please give your story a title.

**Prompt**

**Student enters story here**

*Respondents 'code' their stories themselves*

# Participatory Narrative Analytics for “belonging”

Online survey integrated into a narrative analytics platform

*If there was alienation in my story, it came from...*

Georgetown Staff (Staff of GSP, CMEA, Campus Ministry, etc.)

Georgetown faculty (e.g. Professors)

Family

*If I felt discouraged to turn to my family for support at the time of my story, it was because:*

They wouldn't understand.

I feel responsible for handling this on my own.

I didn't want to burden them.

Purpose Plan Do Review

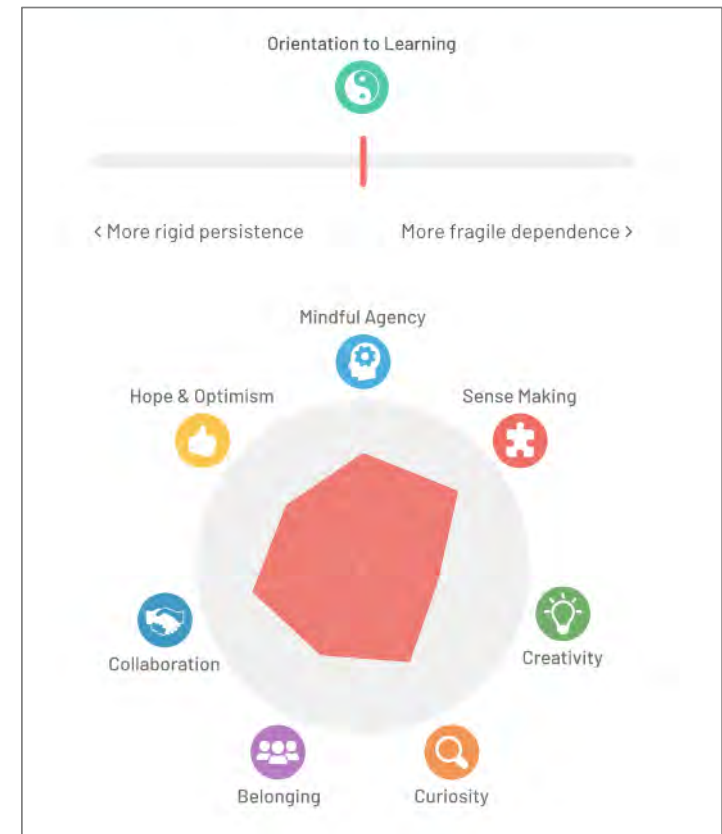

### Learning Power Survey

STEP 1 / 13

	No, not at all like me	Not very much like me	A little like me	Quite like me	Quite a lot like me	Yes, very much like me
I like to find my own ways of doing things	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I have at least one person close to me who I can turn to for guidance in my learning	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I like to try out new learning in different ways	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
I make connections between what I am learning and what I have	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

A language for learning dispositions

## Poles of the Learning Power dimensions

<b>Positive</b>	<b>Negative</b>
Mindful Agency	Unaware, passive, mindless
Hope and Optimism	Stuck and static
Sense-making	Data accumulation
Creativity	Rule bound
Curiosity	Passive
Collaboration	Independent or dependent
Belonging	Isolated, split off, lonely
Openness to learning	Closed, brittle or fragile & dependent

# Personalised feedback report (e.g. for **Belonging**)

## DETAILED RESULTS

### **Belonging**

...is trusting that you will be understood and find support from people around you when you need it.

The opposite of this is feeling 'alone' or left out.

### **Your Own Result**

You can see from your profile there's a fair bit of room for you to improve in this dimension.

Is that what you want to work on? If so, you might reflect on what your profile is telling you.

Are there times when you feel more separate and less supported in your learning than you would like to be?

How could you improve your sense of 'connectedness' in your learning community?

- Is there anyone you could ask to link up with, whom you could talk things through with, who'd support you in your reflections and decisions?
- Could you find a coach or mentor of your own?
- Is there someone with a responsibility to support you, whom you could make better use of?
- There may be others who are needing the same. What could you do to build more of a 'learning community', of people with a shared commitment to learn, improve and do better?

You might be fine for a while, learning without this close connection and support, but your success is likely to be greater in the long run if you have a stronger sense of Belonging in your learning.

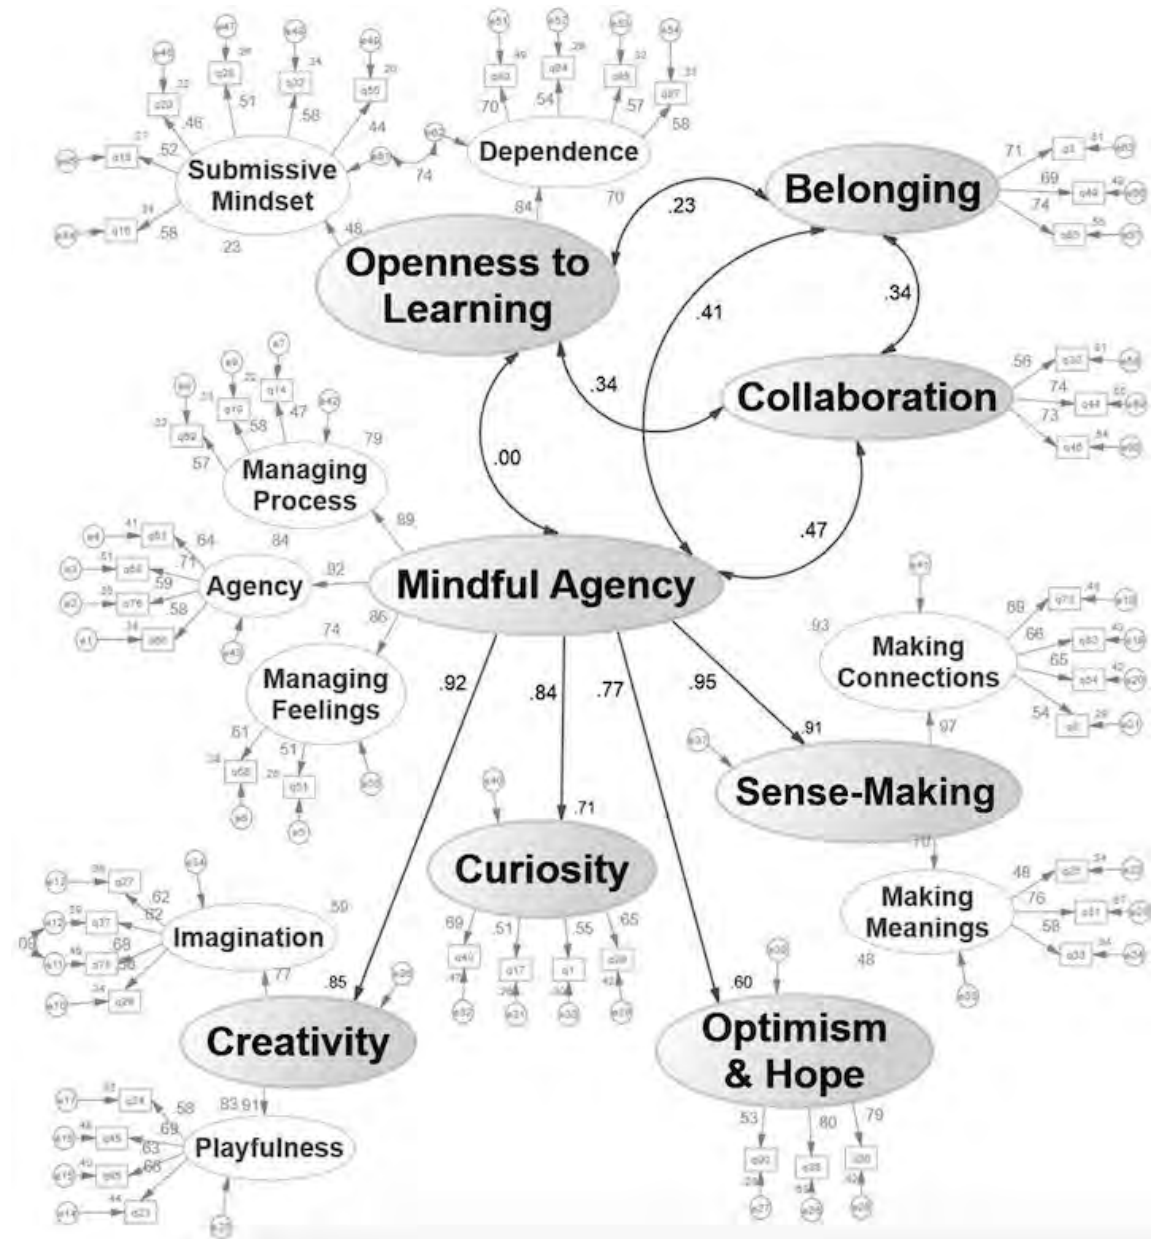

Could any of the other learning dimensions help you with this?

Your coach, if you have one, is the ideal person to support you.

# “Learning Power” is a multi-dimensional construct for assessing learning dispositions

100003	Michael Brown	90	100%	Positive	Feedback Sent
100004	Sarah White	60	70%	Negative	Feedback Pending
100005	David Green	78	85%	Neutral	Feedback Sent

**Week 3 feedback**

Personalized Text

Dear {ColumnName}:

We are now at Week 3 of the semester. This is just a friendly check-in with you, regarding your progress with the activities in the past week. If {Week 3 login} < 10% your online activity seems rather low. Are you catching up with your learning regularly enough? Research has established that regular consistent study is best so that you don't fall behind. Schedule a regular time each week to review what you've learned over the previous week. This study habit will be useful for your other courses as well. It's crucial to {Week 3 login} > 10%. It looks like you've been actively accessing the Canvas site, which is a good start! Do you have any questions about what you're learning so far? I encourage you to take note of concepts you're grappling with, and prepare to raise them in the discussion forums or in class. (handing)

Next week won't be starting on a new topic, behavioral finance since. Have a look at <https://www.youtube.com/watch?v=7ICP-0x5n00> before coming to class so that you won't get lost in the discussion!

See you in class!

Cheers,

## Reflective writing is a widely used activity to deepen experiential learning

*“Before I came to this class I had never really thought much about gender and what it means or that it is something that is fluid. Taking this course was completely eye opening and really made me think about things I have never had the chance to think about.”*

# AcaWriter 24/7 personalised feedback on drafts

Reflective Report

Feedback

Resources

- ✓ ■ Initial thoughts and feelings about a significant experience.
- ✓ ● The challenge of new surprising or unfamiliar ideas, problems or learning experiences.
- ✓ **Deeper reflection, personally applied.**
- ✓ ► How new knowledge can lead to a change
  
- ✓ Expressions indicating belief, learning, or knowledge.
- ✓ Expressions indicating self critique
- ✓ Words associated with strong feelings
  
- ✓ ⚡ Sentence too long, might disengage the reader. Try breaking it into smaller sentences

outcomes for the patient. ► **Thus, this experience taught me that in future, *I must* take a patient-centred approach. ■●► *I must* spend time addressing the patients concerns and demonstrate excellent communication with them so they can fully understand their clinical picture and history.** This relates to Domain 2: Communication and Collaboration, Standard 4: Apply Interpersonal Communication Skills to Address Problems, which is a standard in the National Competency Standards Framework for Pharmacists in Australia (2016). The incident has taught me to use a whole range of communication techniques when counselling a patient. It gave me the opportunity to practice this sort of behaviour in my subsequent weeks of clinical placement. ● **It has strongly encouraged me to shift my perspective to one that focuses more on patient-centred care. ■ I personally think that this is crucial in ensuring that a patient's health objectives are met.** This standard I have obtained is important for any practising pharmacist.
